

5 Tips for Organizing Your Fridge

Tired of rummaging through your fridge every time you cook? These quick tips can help keep food fresh and easy to find:

1. Clear Out Clutter ~ Toss expired items and anything you know you won't eat. You'll free up more space than you think.
2. Use Door Storage Wisely ~ Store condiments and less sensitive items in the door and top shelf — they're the warmest spots.
3. Stack Smart ~ Use clear, stackable containers to save space and group like items together.
4. Use Drawers Properly ~ Fruit, veggie, and meat drawers are made for a reason — they help preserve freshness longer.
5. Ditch Extra Packaging ~ Get rid of bulky, half-empty boxes to instantly open up space.

A little organization goes a long way — and makes mealtime a whole lot easier.

No-Bake Berry Icebox Cake Recipe

A cool, creamy dessert that's perfect for summer gatherings—or just because!

Ingredients:

- 2 cups heavy whipping cream
- 1/4 cup powdered sugar
- 1 tsp vanilla extract
- 1 box graham crackers
- 2 cups mixed berries (strawberries, blueberries, raspberries)
- Optional: mint leaves for garnish

Instructions:

In a large bowl, whip the cream with powdered sugar and vanilla until soft peaks form.
In a 9x9 dish, spread a thin layer of whipped cream on the bottom.
Add a layer of graham crackers, breaking them as needed to fit.
Spread more whipped cream on top, then add a layer of berries.
Repeat layers (crackers, cream, berries) until you run out—finish with berries on top!
Cover and refrigerate for at least 4 hours, or overnight. The graham crackers will soften into a cake-like texture.
Garnish with mint leaves before serving, if you'd like!

Tip: Try it with peaches or mango for a tropical twist!

Keep Cool Without Cranking the AC

Looking to cut your electric bill or just not a big fan of blasting the air conditioning? Here are a few smart ways to stay cool without turning down the thermostat.

- Let the Breeze In ~ Floor fans work best since they pull in cooler air from ground level. Set them up strategically to circulate airflow.
- Skip the Oven ~ Baking can raise your room temperature by several degrees. Try using an air fryer instead—it's faster and won't heat up your home.
- Block the Sun ~ Close curtains or blinds during the day to keep direct sunlight (and heat) out.
- Cool Down Your Bedding ~ Consider cooling sheets and pillows designed to help regulate body temperature for a more restful night.

With just a few small changes, you can keep your space more comfortable all summer long—no AC required.
